Collecting Recipes

GNOME Recipes Hackfest

- https://wiki.gnome.org/Hackfests/Recipes2018
- Goals:
  - Have a common (between GNOME and Endless) strategy to distribute and update offline content packs
  - Think about data storage and how to contribute back to the database, plus sharing
  - Find common parts between different card UIs and see if we can share this
  - Experiment with Emeus for layout in GNOME recipes
  - Maybe build an GNOME recipes lookalike using the eos app framework
  - **Get at least 10 recipes added**
  - Think about how non-strictly recipes content fits in the picture (such as techniques, ingredients, tools...)

Recipe Collection

- https://wiki.gnome.org/Hackfests/Recipes2018/RecipeCollection
  - **Translate the Indonesian recipes that we received**
  - **Add the Indonesian recipes to the collection**
  - Set up an online contest for recipe contribution
  - Organize a recipe collection hackfest in Turkey
  - **Organize a recipe collection hackfest in Indonesia**
  - Allow recipes to load "recipe packs" that contain local recipes, that are not necessarily translated
  - Make "recipe packs" show up in GNOME software in some form

Recipes Apps

- GNOME
  - GNOME Recipes
- Endless
  - Cooking app, available in:
    - Arabic (com.endlessm.cooking.ar)
    - Bangladesh (com.endlessm.cooking.bn_BD)
    - English (com.endlessm.cooking.en)
    - Spanish (com.endlessm.cooking.es)
    - Spanish Guatemala (com.endlessm.cooking.es_GT)
    - Portugese (com.endlessm.cooking.pt)
  - Diah Didi's Kitchen (com.endlessm.diah_didis.id), only in Indonesian
- Your Own Apps

Collecting Recipes- Idea

- Organize recipes contest
- Download the template, write recipe, and upload it
- Project with other FOSS Community
  - GNOME-ID
  - openSUSE-ID
  - BlankOn (Indonesian Debian-based Distribution)
  - Endless Ambassador and Community
- People who submit more than 7 recipes will get the prizes (community stickers, tote bag, and shoes)

Punya resep masakan khas Indonesia?

Yuk Bagikan Resepmu!

GNOME Recipes

GNOME Recipes merupakan aplikasi yang dapat membantu Anda untuk memasak dengan menu-menu umum maupun khusus yang telah tersedia di dalam aplikasi. Sayangnya sampai sampai saat ini aplikasi GNOME Recipes belum memuat menu-menu Indonesia. GNOME memerlukan kontribusi dari komunitas untuk dapat memperkaya menu pada GNOME Recipes ini.

Ayo Berkontribusi!

Kirim resep terbaikmu lengkap dengan foto masakan ke

https://s.id/gnomerecipes

kesempatan untuk berkontribusi ini akan dibuka selama bulan Mei--Juni 2018.

Kirim minimal 7 resep untuk mendapat hadiah menarik dari GNOME Indonesia, BlankOn, Endless dan openSUSE Indonesia.

Informasi Lengkap

GNOME Indonesia · BlankOn · ENDLESS

Collecting Recipes - Result

- Organized by small team
  - Led by Ahmad Romadhon (GNOME newcomer)
  - Translation to English helped by Harry Suryapambagya (translation volunteer)
  - Rest of all by me
- Number of submission
  - Five people
  - 22 recipes
  - two winners
- After contest, we still received 29 recipes in raw text
- Need more effort after contest
  - Translate (recipes is in Indonesian)
  - Input to GNOME Recipes

Recipe Collection

- https://wiki.gnome.org/Hackfests/Recipes2018/RecipeCollection
  - **Translate the Indonesian recipes that we received**
  - **Add the Indonesian recipes to the collection**
  - Set up an online contest for recipe contribution
  - Organize a recipe collection hackfest in Turkey
  - **Organize a recipe collection hackfest in Indonesia**
  - Allow recipes to load "recipe packs" that contain local recipes, that are not necessarily translated
  - Make "recipe packs" show up in GNOME software in some form

Translation in GNOME Recipes

Barriers

- GNOME l10n Indonesian consists of only two people
  - One translator, reviewer, and committer
  - One translator and reviewer
- Not find a suitable terminology
- Local ingredients that not available worldwide
- Different measurements
- ...

Barriers (2)

- Philip Chimento (Endless, GNOME Board Directors) on https://ptomato.wordpress.com/2018/05/07/indonesian-recipes/
  - “In different countries people cook very differently, so translating a recipe from one language into another is not enough.”
  - “You also have to adapt the recipe to the ingredients that you can get in the country, and sometimes it’s not possible to get the same taste.”
  - “It can also be that when one language is used in two countries, the same recipe still won’t work for both.”
    - metric systems (°C, kg, ml) vs imperial system (°F, pounds, quarts, ounces, bushels, specks, caltrops, and jeroboams)

Thank You

謝謝
